DOOR KNOBS.

Our Screwless Spindle, as shown in the above cut, is an improved device for firmly securing knobs to the spindle at any point desired, without side knob screws, thus avoiding the possibility of knobs becoming loosened by constant wear. The adjustment is made entirely on the inside knob, the outside knob being permanently fastened to the spindle, so that it cannot be removed or stolen. The Screwless Spindle also possesses the advantage of insuring accurate adjustment to doors of any thickness without the use of washers.

All our Cast Bronze Door Knobs can be furnished to order with Screwless Spindles, at extra cost.

PAYSON'S "SOLID GRIP" TRANSOM LIFTERS.

Reversible. Self Locking.
Adapted for either Top, Bottom or Centre Hung Transoms.

Class No. 1.
Centre Hung.
(Pull down to open.)

Class No. 2.
Centre Hung.
(Push up to open.)

Class No. 3.
Top Hung.

Class No. 4
and Special Class 4.
Bottom Hung.

Regular Classes are as follows :

Class No. 1,	Centre Hung.	Pull down to open.
" 2,	" "	Push up to open.
" 3,	Top Hung.	
" 4,	Bottom Hung.	

A "Special Class 4," with separate guide for Bottom Hung Transoms, where the wood-work will not admit of the use of regular goods, can be furnished at 20 per cent. advance over regular list.

In ordering, give Size Number, Class Number and Finish. Bottom Hung Transoms always require Lifters 18 inches longer than Top or Centre Hung.

The lengths listed are obtained by taking the combined lengths of both main and connecting rods.

To find proper length of Lifter wanted, measure from floor to centre of Transom, then deduct 5 feet for a top or centre hung Transom ; or 3½ feet for a Transom hung at the bottom.

All "Solid Grip" Lifters, except ¼ inch rods, have a Wrought Steel Bracket, which reverses without detaching.

Special Brackets for deeply recessed Transoms can be ordered of any size.

For prices see following page.
